## Life Principles of the Sovereign Integral

The entity model of expression is designed to explore new fields of vibration through biological instruments and transform through this process of discovery to a new level of understanding and expression as a Sovereign Integral. The Sovereign Integral is the fullest expression of the entity model within the time-space universes, and most closely exemplifies Source Intelligence's capabilities therein. It is also the natural state of existence of the entity that has transformed beyond the evolution/saviorship model of existence and has removed itself from the controlling aspects of the Hierarchy through the complete activation of its embedded Source Codes. This is the level of capability that was "seeded" within the entity model of expression when it was initially conceived by Prime Creator. All entities within the time-space universes are in various stages of the transformational experience and each are destined to achieve the Sovereign Integral level as their Source Codes become fully activated.

The transformational experience is the realization that the entity model of expression is capable of direct access to Source Intelligence information, and that the information of Prime Creator is discovered within the entity level of the Sovereign Integral. In other words, the human instrument, complete with its biological, emotional, and mental capabilities, is not the repository of the entity's Source Codes. Nor is the human instrument able to reach out and gather in this liberating information--this glorious freedom to access All That Is. It is the entity that is both the harbor of, and instrument of access to, the Source Coding activation that permits the transformational experience to manifest through the integration of the human instrument and the sovereign entity.

The transformational experience consists of the realization that perceived reality is Source Reality personified in the form of individual preferences. Thus, Source Reality and sovereign reality become inseparable as the wind and air. This confluence is realized only through the transformational experience, which is unlike anything known within the time-space universes.

There have been those upon terra-earth who have experienced a shallow breath of wind from this powerful tempest. Some have called it ascension, others have attributed names like illumination, vision, enlightenment, nirvana, and cosmic consciousness. While these experiences are profound in human standards, they are only the initial stirrings of the Sovereign Integral, as it becomes increasingly adept at touching and awakening the remote edges of its existence. What most species

define as the ultimate bliss is merely the impression of the Sovereign Integral whispering to its outposts of form and nudging them to look within to their roots of existence and unite with this formless and limitless intelligence that pervades all.

The transformational experience is far beyond the calibration of the human drama much like the stars in the sky are beyond the touch of terra-earth. You can observe the stars with your human eyes, but you will never touch them with your human hands. Similarly, you can dimly foresee the transformational experience with the human instrument, but you cannot experience it through the human instrument. It is only accessed through the wholeness of the entity, for it is only in wholeness that the Source Codes and their residual effects of Source Reality perception can exist. And truly, this wholeness is only obtained when the individual consciousness is separated from time and is able to view its existence in timelessness.

Nevertheless, the human instrument is critical in facilitating the transformational experience and causing it to trigger--like a metamorphosis--the integration of the formful identities into the Sovereign Integral. This is the next stage of perception and expression for the entity model, and it is activated when the entity designs its reality from life principles that are symbolic of Source Reality, as opposed to the reality of an external source that is bound to the evolution/saviorship model of existence.

These life principles are Source Intelligence templates of creation. They are designed to create reality from the perspective of the Sovereign Integral and hasten its manifestation within the fields of vibration that has thus far repelled it. They are principles that construct opportunities for the integration of the entity's formless and formful identities. They are bridges that the human instrument--with all of its componentry intact--can experience the Sovereign Integral perception of wholeness.

As the human instrument becomes increasingly responsive to Source Intelligence it will gravitate to life principles that symbolically express the formative principles of prime creation. There are wide ranges of expressions that can induce the transformational experience of the Sovereign Integral and liberate the entity from time-space conditioning and external controls. Inasmuch as the expression can vary, the intent of the expression is quite narrowly defined as the intent to expand into a state of integration whereby the human instrument becomes increasingly aligned with the Sovereign Integral perspective.

There are three particular life principles that accelerate the transformational experience and help to align the human instrument with the Sovereign Integral perspective. They are:

- 1) Universe relationship through gratitude
- 2) Observance of Source in all things
- 3) Nuturence of life

When the individual applies these principles, their life experience reveals a deeper meaning to its apparently random events--both in the universal and personal contexts.

#### Universe Relationship through Gratitude

This is the principle that the Universe of Wholeness represents a collective intelligence that can be personalized as a single Universal Entity. Thus, in this model of inference, there are only two entities in the entire cosmos: the individual entity and the Universal Entity. Inasmuch as the individual is impressionable and constantly changing to adapt to new information, so is the Universal Entity, which is a dynamic and living template of potential energies and experiences that are coherent and as knowable as a friend's personality and behavior.

The Universal Entity is responsive to the individual and its perceptions and expressions. It is like a composite omnipersonality that is imbued with Source Intelligence and responds to the perceptions of the individual like a pool of water mirrors the image that overshadows it. Everyone in a human instrument is indeed, at their innermost core, a sovereign entity that can transform the human instrument into an instrument of the Sovereign Integral. However, this transformation is dependent on whether the individual chooses to project an image of a Sovereign Integral upon the "mirror" of the Universal Entity, or project a lesser image that is a distortion of its true state of being.

The principle of universe relationship through gratitude is primarily concerned with consciously designing one's self image through an appreciation of the Universal Entity's supportive "mirror". In other words, the Universal Entity is a partner in shaping reality's expression in one's life. Reality is an internal process of creation that is utterly free of external controls and conditions if the individual projects a sovereign image upon the mirror of the Universal Entity.

This process is an interchange of supportive energy from the individual to the Universal Entity, and this energy is best applied through an appreciation of how perfect and exacting the interchange occurs in every moment of life. If the individual is aware (or at least interested in having the awareness) of how perfect the Universal Entity supports the individual's sovereign reality, there is a powerful and natural sense of gratitude that flows from the individual to the Universal Entity. It is this wellspring of gratitude that opens the channel of support from the Universal Entity to the individual and establishes a collaboration of purpose to transform the human instrument into an expression of the Sovereign Integral.

It is principally gratitude--which translates to an appreciation of how the inter-relationship of the individual and the Universal Entity operates--that opens the human instrument to its connection to the sovereign entity and its eventual transformation into the Sovereign Integral state of perception

and expression. The relationship of the individual with the Universal Entity is essential to cultivate and nurture, because it, more than anything else, determines how accepting the individual is to life's myriad forms and manifestations.

When the individual accepts changes in sovereign reality as the shifting persona of the Universal Entity, they live in greater harmony with life itself. Life becomes an exchange of energy between the individual and the Universal Entity that is allowed to play out without judgment and experienced without fear. This is the underlying meaning of unconditional love: to experience life in all its manifestations as a single, unified intelligence that responds perfectly to the projected image of the human instrument.

It is for this reason that when the human instrument projects gratitude to the Universal Entity, regardless of circumstance or condition, life becomes increasingly supportive in opening the human instrument to activate its Source Codes and live life within the framework of the synthesis model of expression. The feeling of gratitude coupled with the mental concept of appreciation is expressed like an invisible message in all directions and at all times. In this particular context, gratitude to the Universal Entity is the overarching motive behind all forms of expression that the human instrument aspires to.

Every breath, every word, every touch, every thought, every thing is centered on expressing this sense of gratitude. A gratitude that the individual is sovereign and supported by a Universal Entity that expresses itself through all forms and manifestations of intelligence with the sole objective of creating the ideal reality to activate the individual's Source Codes and transform the human instrument and entity in to the Sovereign Integral. It is this specific form of gratitude that accelerates the activation of the Source Codes and their peculiar ability to integrate the disparate componentry of the human instrument and the entity, and transform them to the state of perception and expression of the Sovereign Integral.

Time is the only factor that distorts this otherwise clear connection between the individual and Universal Entity. Time intervenes and creates pockets of despair, hopelessness, and abandonment. However, it is these very "pockets" that often activate the Source Codes of the entity and establish a more intimate and harmonious relationship with the Universal Entity. Time establishes separation of experience and this creates doubt in the Universal Entity's system of fairness and overarching purpose. In turn, this creates fear that the universe is not a mirror but rather a chaotic, whimsical energy.

When the human instrument is aligned with the Sovereign Integral and lives from this perspective as a developing reality, it attracts a natural state of harmony. This does not necessarily mean that the human instrument is without problems or discomforts, rather it signifies a perception that there is an integral purpose in what life reveals. In other words, natural harmony perceives that life experience is meaningful to the

extent you are aligned with the Sovereign Integral, and that your personal reality must flow from this strata of the multidimensional universe in order to create lasting joy and inner peace.

Gratitude is a critical facet of love that opens the human instrument to acknowledge the role of the Universal Entity and redefine its purpose as a supportive extension of sovereign reality, rather than the whimsical outreach of fate or the exacting reaction of a mechanical, detached universe. Establishing a relationship with the Universal Entity through the outflow of gratitude also attracts life experience that is transformative. Experience that is richly devoted to uncovering life's deepest meaning and most formative purpose.

#### Observance of Source in All Things

This is the principle that Prime Creator is present in all realities through all manifestations of energy. IT is interwoven in all things like a mosaic whose pieces adhere to the same wall, and are thus, unified. However, it is not the picture that unifies the mosaic, but the wall upon which its pieces adhere. Similarly, Prime Creator paints a picture so diverse and apparently unrelated that there appears to be no unification. Yet it is not the outward manifestations that unify, it is the inward center of energy upon which the pieces of diversity are layered that unifies all manifestations.

This centerpiece of energy is the collective storehouse of all life in all fields of vibration within the Universe of Wholeness. It is Prime Creator who divests ITSELF in all forms through the projection of ITS Source Intelligence in to all fragments of life. Thus, Source Intelligence--acting as an extension of Prime Creator--is the unifying energy that is the "wall" upon which all the pieces of life's mosaic adhere. Life flows from one energy Source that links all to All and one to One.

Observance of Source in All Things is the principle that all manifestations of life convey an expression of Prime Creator. It does not matter how far the unifying energy has been distorted or perverted; the Source can be observed. It is the action of perceiving the unification of energy even when the outward manifestations appear random, distorted, unrelated, or chaotic.

When all manifestations of life are genuinely perceived as fragmentary expressions of Prime Creator, the vibration of equality that underlies all life-forms becomes perceptible to the human instrument. Life initially emerges as an extension of Source Reality, and then, as an individuated energy frequency invested within a form. It vibrates, in its pure, timeless state, precisely the same for all manifestations of life. This is the common ground that all life shares. This is the tone-vibration of equality that can be observed within all life forms that unifies all expressions of diversity to the foundation of existence known as Prime Creator. If an individual is able to look upon any form of life with the outlook of equality, then they are observing Source in all things.

While this may seem like an abstract concept, it is actualized through the practice of looking for the outward and inward manifestations of Prime Creator. In a very real sense, the individual expects to observe the workings of Source Intelligence in every facet of their experience. It is the unassailable expectation that everything is in its rightful position, performing its optimal function, and serving its purpose to activate the fullest expression of its life in the present moment. It is the outlook that all life is in a state of optimal realization and experience regardless of condition or circumstance. It is the perception that life is perfect in its expression because it flows from perfection, and that no matter how divergent its manifestations are, life is an extension of Source Reality.

In light of the obvious turmoil and apparent destruction that accompanies life on terra-earth, this is an outlook or perception that seems naive. How can life--in all its forms and expressions--be perceived as optimal or perfect? This is the great paradox of life, and it cannot be reconciled with the human instrument's mental or emotional capabilities. It can only be understood in the context of the entity, which is deathless, limitless, timeless, and sovereign. Paradoxes exist because the human drama is too limited in scope and scale to allow a perception of wholeness to intervene and illuminate how the pieces of the puzzle are unified in perfect relation.

The human drama is circumscribed by the dimensions of time and space and the elements of energy and matter. It is played out upon the stages of survival and dysfunctional behavior because of the Hierarchy's methods of controlling information and manipulating conditions. The entity within the human instrument is largely unexpressed and under-utilized in the human drama, and therefore, life's apparent perversions and imperfections are seen in isolation as impediments to perfection rather than perfection itself.

Life is perfect in its resolve to expand and express an intelligence that is limitless. This is the fundamental purpose of life in all its diverse manifestations, and this is the presence of Prime Creator--expressing ITSELF as a vibration of equality--that can be observed in all things. Sensory input derived from the human instrument is limited to frequencies in specific ranges that only convey an echo of this Source vibration. The true frequency is understood through deliberate and focused contemplation of equality inherent in all things, and the ability to penetrate beyond the picture of a thing to the origin of the picture.

These insights require a new sensory system beyond the five-senses that rule the human world in your time. These new senses are the outgrowth of the Source Code activation, and represent the first stage of the transformation experience. With this new perceptual ability, the human instrument will be capable of sensing not only the presence of Prime Creator, but also the timeless essence within all life that is individualized

and uniquely separate from Prime Creator.

Calling forth the perceptions of the entity within the human instrument is the ideal method to access a lasting sensitivity to the Source vibration. This is how an individual can develop the ability to observe Source in all things. It is not only that Prime Creator is within every individual manifestation of energy, but is also the wholeness of life itself. Thus, the principle requires an observance of Source in all ITS diverse forms of manifestation, as well as in the wholeness of life.

#### Nurturance of Life

Life, in this definition, is an individual's sovereign reality. It is subjective and impressionable to the human instrument. Life is the wholeness of experience flowing past the individual's field of perception in the dimension of nowness. There is never a closure to life or final chapter written. It is eternal, but not in the abstract sense of never ending or beginning, but rather in the real sense that life is ever expanding in order to express Source Intelligence in all fields of vibration within the Universe of Wholeness.

The nurturance of life is the principle that an individual is in alignment with the natural expansion of intelligence inherent within all life. This is an alignment that enhances the life-energy that flows past the individual with the clear intent of gentle support. It is the action of identifying the highest motive in all energy forms and supporting the flow of this energy towards its ultimate expression. In so doing, the action is performed without judgment, analysis, or attachment to outcome. It is simply nurturing the energy that flows from all manifestations and supporting its expression of life.

This is a departure from the normal perception that nurturing support can only be granted when energy is in alignment with personal will. However, when the individual can view life as an integrated energy flowing in the expression of expanding intelligence, life is honored as an extension of Prime Creator. In this context, there is no energy that is mis-directed or unworthy of support and nurturance. While this may seem contrary to the evidence of abusive energy upon terra-earth, even energy that is laden with "evil intent" is nevertheless energy that is flowing outward in search of a higher expression.

All forms of energy can be nurtured and supported to their highest expression, and this is the fundamental action of this principle. It requires the ability to perceive the causal motive and ultimate expression of life-energy as it passes through the individual's sovereign reality. Energy is an element of life that is so subtly interwoven with form that it is one; in much the same manner as space and time are inextricably linked in union. Energy is a motive. It is intelligent beyond the mind's ability to reason. While it is a force that can be subject to human applications that deny its highest expression, energy is always imbuing life with the motive to expand and evolve.

Life-energy is always in a state of becoming. It is never static or

regressive in its natural state. The human instrument is very capable of nurturing this natural expansion of energy to forge new channels of expression and experience. In fact, it is the primary purpose of the human instrument to expand the life-energy that encircles its sovereign reality within physical existence and transform it to new levels of expression that more accurately reflect the perspective of the Sovereign Integral.

There are many specific actions that can be taken to nurture life. Each entity is, in a sense, programmed within its Source Codes to transmute energy through a tremendous variety of means. Working through the human instrument, the entity is able to collect and store energy within the human instrument and re-direct its purpose or application. The transmutation of energy can occur on either the personal or universal levels of expression. That is, within the sovereign reality of an individual, energy can be transmuted to conform to a vision of personal welfare, or aligned with a vision of universal welfare and goodwill.

One of the best methods to transmute energy is through one's belief system. All beliefs have energy systems that act like birthing chambers for the manifestation of the belief. Within these energy systems are currents that direct life experience. The human instrument is aware of these currents either consciously or unconsciously, and allows them to carry it into the realm of experience that exemplifies its true belief system.

By cultivating beliefs that expand and transform energy, the human instrument is able to engage energy systems that are nurturing to life in all its myriad forms. When beliefs are clearly defined as preferred states of being, the energy system is engaged in nowness--not in some future time. Now. The energy system becomes inseparable from the human instrument and woven into its spirit like a thread of light. Clarity of belief is essential to engaging the energy system of the belief, and allowing the nurturance of life to prevail in all activities.

So again, the nurturance of life is critical to both personal and universal realities within the Universe of Wholeness which contains all the fields of vibration that are interlinked like threads of an infinitely expanding fabric. Thus, as the individual awakens to their creative power to transmute energy and enhance it with the clear intent of gentle support, they become transmitters of Source Reality and architects of the synthesis model of existence.

Through the ongoing application of these life principles, Source Intelligence increasingly becomes the identity of the entity, and the entity becomes the identity of the human instrument. Thus, identity is transformed, and in the wake of this transformation, the Sovereign Integral unifies the human instrument with the entity, and the entity with Source Intelligence. It is this unification and shifts of identity that is the explicit purpose in expressing the life principles of the Sovereign Integral. If there is any other intention or objective these principles will remain misunderstood and their catalytic powers dormant.

It is the perspective of the Sovereign Integral that all life is pure love in its fullest expression, and that in this single concept, all life is conceived and forever exists. This becomes the core belief from which all other beliefs arise, and by their extension, one's belief system emerges with a clear intent of supporting this fundamental perspective. Of nurturing, observing, and appreciating the Universe of Wholeness as the cradle from which all life is created, evolves, and ultimately acknowledges.

These life principles are merely symbols represented in words and served to the human instrument as a potential recipe to stir awake the embers of light that tirelessly burn within. There are no specific techniques or rituals that are required to invoke the power of these principles. They are simply perspectives. In a real sense, they are intentions that attract experience that expand consciousness. They do not provide quick fixes or instant realizations. They are amplifiers of personal will and intention that clarify how one lives. Their transformative power is contained exclusively in the intent of their application.

Through these life principles of the Sovereign Integral, the individual can become a master of unlimiting the Self. Boundaries are set, veils are pulled down, and one's light is subdued, simply because external, hierarchical controls create fear of the unknown and mystical practices of a sovereign being. In these life principles, if they are truly applied with proper intent, are the tools to accelerate the emergence of the Sovereign Integral and feel its perspective, its insights, and its empowered abilities to create new realities and shape them as learning adventures that liberate and expand consciousness. This is the underlying purpose of the principles and perhaps the best reason to explore them.

### **The Shifting Models of Existence**

The consciousness of the Sovereign Integral is the destination that beckons the human instrument inward into the reality of Prime Creator. In all of the wanderings of the human consciousness from Source Reality, it has eliminated the compelling features of Source Reality through the application of the logical mind and the persistent belief in the language of limitation that flows from the external controls of the hierarchy.

Source Reality, hidden behind language, has gradually become "illuminated" by the prophets of your world, and has thus, taken on the image of language, rather than the expression of its compelling features. Language is the purveyor of limitation. It is the pawn of tyranny and entrapment. Virtually all entities within the time-space universe desire to preserve a dependence upon a hierarchy that stretches between the individual and the compelling features of Source Reality. It is the hierarchy that utilizes language as a form of structural limitation, though in relative terms, it can appear to be liberating and empowering.

Source Reality is the dwelling place of Prime Creator, and it dances outside of the constructs of any language. It is complete within itself, and has a singular purpose of demonstrating the collective potential of all species within the Universe of Wholeness. It is the archetype of perfection. It is the standard bearer of each entity's innate design and ultimate destiny. ITS essence is so far beyond conception, that the human instrument's tendency is to resort to the language of externals--and ultimately the hierarchy--to define Source Reality.

The hierarchy, through the purveyance of an evolution/saviorship model of existence, has attempted to guide the development of all entities throughout the Universe of Wholeness. The connection between the individual and the Source is subtly undermined through the layers of language, belief system manipulation, and ritual controls designed by the hierarchy to intervene between the spiritual essence of entities and their source, Prime Creator.

Each individual must know themselves to be free of all forms of external reliance. This is not to imply that one should not trust others or band together in alliances of friendship and community. It is simply a warning that relative truth is constantly shifting in the hands of those who desire to control, and even though their motives may be of good will, it is still a form of control. When the hierarchy withholds information, the interpretive centers for relative truth are positioned to acquire and maintain power rather than dispensing the empowerment of Source equality.

There are so many layers of relative truth that if you listen to the language of externals, you will most likely abandon your own power in favor of the proclamation of language. Language is seductive to the ego's drive for power and control, as well as the mind's inclination to surrender to, and believe in, the language of externals. It can lure the unsuspecting into believing images and ideas--real or imagined--for the sake of holding individuals in bondage to a lesser truth, or keep individuals supporting the hierarchy when it no longer serves a purpose. The time is fast approaching when the veils of control at all levels of the hierarchy will be rendered obsolete by entities who are destined to pull down the veils and allow sovereign power to prevail over hierarchical power.

There are entities who have woven their future existence with terra-earth and are destined to demonstrate the truth of Source equality among all entities at all levels of expression. It will become the fundamental purpose of the hierarchy to slowly remove these barriers to equality in such a way that the hierarchy appears to be the savior of consciousness rather than the guard of consciousness. There are those present who will ensure that the curtain falls swiftly for those who are ready to be equal with their Source, are willing to skirt the hierarchy's tangled pathways, and embrace their divinity as sovereign expressions of Source Reality.

The hierarchy represents diverse interests, perceptions of reality, and motives of action. It is this diversity that causes the hierarchy to become ineffective in leading individuals to their equal status with Prime Creator. However, this diversity is also what permits the hierarchy to attract and initially awaken such a breadth of individuals to their spiritual energies and intuitive centers. Nevertheless, the hierarchy has trapped itself in diversity and vested specialization that prevents it from evolving from an arduous ladder of evolution to a joyous river of Light that is aligned with the purpose of empowering entities to Source equality.

The saviorship concept results from the feelings of inadequacy that constantly surge within the mass consciousness of humanity through the genetic mind. These feelings are related to the fragmentation of the human instrument and its inability--while fragmented--to fully grasp its wholeness perspective and reach into its divine origins and accept itself as equal with Prime Creator. Thus ensues the seemingly endless search to be saved from the inadequacy and insecurity that result from the fragmentation of the human instrument.

The motive to evolve consciousness derives from the feeling of being less than whole. And in particular, the feeling of being disconnected from Prime Creator due to imperfect judgment caused by the fragmentation of the human instrument. It is through these feelings that the fragmentation perpetuates itself for the entire species and is passed into the genetic mind which is the shared foundation of the human instrument. The genetic mind of the human species is the single most powerful component of the hierarchy and it is formed by the very conditions of the human instrument living in a three-dimensional, five-sensory context that is all-consuming.

When the entity initially enters a human instrument at birth, it is immediately fragmented into a physical, emotional, and mental spectrum of perception and expression. From that day forward the entity is carefully conditioned to adapt into, and navigate within, the three-dimensional, five-sensory context of terra-earth. In effect, the entity purposely fragments its consciousness in order to experience separation from wholeness.

In this state of separation, the entity has handicapped itself for the purpose of new experience and a deeper understanding of the Primal Blueprint or grand vision of Prime Creator. Through this deeper understanding, the entity can, through the human instrument, transform the three-dimensional context into a self-aware, integrated component of the Universe of Wholeness. This magnificent and purposeful endeavor produces the urge within the human instrument to seek out its wholeness and re-experience its divine connection to Prime Creator.

This search, in large measure, is the fuel that drives the individual to seek out and explore the evolution/saviorship model of existence. It provides the individual with the motivation to seek help and guidance from a specific subgroup

of the hierarchy, and in so doing, develop a sense of belonging and unity. It is this very same sense of belonging and unity that helps to catalyze a growing awareness of the underlying union between the human instrument, the Entity Consciousness, the Universe of Wholeness, Source Intelligence, and Prime Creator.

This is why the evolution/saviorship model is so critical as a component to the Grand Experiment. It is the stage whereby the human instrument develops a sense of unity and belonging. A sense of relationship to some grand and encompassing vision. This is why the hierarchy nurtures saviors. It is also why the feelings of inadequacy and insecurity are developed and nurtured by the hierarchy. It actually hastens the unification of humanity, which in turn, will hasten and lead to the unification of humanity with the Universe of Wholeness.

Spiritual leaders are able to peer deeply beneath the surface reality of life and experience how intricately connected every life form is, and how this composite of life is intelligent far beyond the human instrument's capability to both perceive and express. It is because of this condition that spiritual leaders can only interpret reality through their personal abilities to perceive and express life's dimensional depth and limitless intelligence. No one is able to articulate life's dimensional depth and breadth with the tools of language. They can only, at best, describe their interpretation or their impressions.

Every human is able, in varying degrees, to peer beneath the surface reality of life and perceive and express their personal interpretations of the Universe of Wholeness. They require only the time and intention to develop their own interpretations. And this is precisely what all the great spiritual leaders have taught. Life's deeper meaning is not an absolute to be experienced by the chosen few, but an evolving, dynamic intelligence that wears as many faces as there are life forms. No life form or species has the exclusive portal into the Universe of Wholeness in which Prime Creator expresses ITSELF in all ITS majesty. The portal is shared with all because Prime Creator is within all things.

The great spiritual leaders of terra-earth have all, in their own way, interpreted the Universe of Wholeness and humanity's role therein. In so doing, their interpretations, because they were articulated with authority and depth of insight, became a target of debate among various subgroups of the hierarchy. This debate and inquiry process creates a polarity of belief. A sympathetic constituency will emerge to defend and embellish their particular leader's interpretation, while everyone else will hold it in contempt of previously held beliefs.

This peculiar method of creating a religion that is fixated on a savior's or prophet's interpretation of the Universe of Wholeness is unique to a species that is exploring the evolution/saviorship model of existence. The spiritual leaders that are recognized as great prophets or saviors have produced a vision of the Universe of Wholeness beyond what was currently defined by the hierarchy. They created a new portal into the

Universe of Wholeness and were willing to share their vision at the expense of debate and probable ridicule.

These men and women were the gateways for humanity to explore new facets of itself. To engage a part of its oversoul or universal consciousness that was essential at that particular time in its evolutionary cycle. But the leader's interpretations too often become interpreted by the followers who desire to create a religion or sect, and the vision quietly recedes into the hands of the hierarchy where it becomes de-vitalized by the very fact that it is connected to a massive structure that both protects and promotes it.

Prime Creator is connected to individuals not organizations. Thus, the hierarchy is unconnected to the Source in a vital and dynamic way. The hierarchy is more connected to its own collective desire to help, to serve, to perform a function that allows the use of power to drive toward the vision of its leaders. In itself, this is not wrong or misguided. It is all part of the Primal Blueprint that orchestrates the unfoldment of consciousness from Prime Source to entity, and entity to Collective Source. This is the spiral of integration that breeds wholeness and cascading beauty within Source Intelligence.

What the hierarchy has loosely labeled as Spirit comes as close as any word to the symbol of Source Intelligence. Source Intelligence inhabits all fields of vibration as an extension of the Source. It is the emissary of Prime Creator that interweaves with the hierarchy as its counter-balance. Source Intelligence is the factor of integrity and alignment, which ensures that the hierarchy is serving its purpose within the Primal Blueprint. Source Intelligence is, in effect, the "scientist" who oversees the Grand Experiment and establishes the criteria, selects the variables, monitors the results, and evaluates the alternative outcomes in the laboratory of time and space.

The Grand Experiment is the ongoing transformation and expansion of Source Intelligence through all entities in all dimensions of existence. It is the purpose of the Grand Experiment to test alternative models of existence to determine, with some certainty, the model that is best able to unify consciousness without impinging on the sovereignty of the entity and Prime Creator. The Grand Experiment is composed of many distinct stages that interlink, leading to the Great Mystery. Most of these different stages are being simultaneously played out within the time-space universe in order to prepare the universe for the impending expansion of Source Reality into all dimensions of existence.

In the case of terra-earth, this is the stage of existence that promotes the clear connection of individual consciousness to the compelling features of Source Reality without the intervention of a hierarchy of any kind. This is when the fables and myths of history step into the light and become known as they truly are and have been. This is the time when language will be transmuted into a new form of communication that exhibits the compelling features of Source Reality in an artistry

of energy and vibration that break down all barriers of control.

It is time to recognize that the hierarchy extends throughout the cosmos to the very borders of discovery. It has branches that extend from every star system, every known dimension; and virtually all life forms are "leaves" of this vast cosmological tree. This constitutes the grand indoctrination of species, spirits, planets, and stars as they each evolve through the branches of the tree. Thus, the hierarchy is an assemblage of externals that desire to invest their energies in support of a sub-group that has nested somewhere within the greatest of all structures--the hierarchy. Service is the operational motive of the hierarchy, and in most cases, this translates into the concept of saviorship and the teacher/student ordering of the universe.

The hierarchy is composed of all entities of all motives that have linked their energies into sub-groups. These sub-groups are independent branches of the vast, cosmological tree that encompasses all things outside of Source Reality. The roots of the tree are bound in the soil of genetic memory and subconscious instincts. At the base of the tree the first branches sprout and they are the oldest, representing the native religions of the species. The middle branches are the orthodox religions and institutions, while the upper branches represent the contemporary belief systems that are newly emerging throughout the universe. The whole tree, in this definition, is the hierarchy, and its seed was initially conceived, planted, and nurtured by Source Intelligence for the purpose of stimulating the Grand Experiment.

This is the experiment of transformation verses evolution. Evolution is the arduous and ongoing process of shifting positions within the hierarchy--always assessing your present position in relation to a new one that beckons you. Transformation is simply the recognition that there are accelerated pathways that bypass the hierarchy leading to sovereign mastership rather than interdependent saviorship, and that these new pathways can be accessed through direct experience of the equality tone-vibration that is present within all entities.

This tone vibration is not what is more commonly referred to as the music of the spheres or the vibration of spirit moving through the universe in resonance to Source intention. It is a vibration that holds together the three principles of the transformational experience: Universe relationship through gratitude, observance of Source in all things, and the nurturance of life. The application of these life-principles in a specific equation of conduct de-couples an entity from the controlling elements of the hierarchy.

How can the hierarchy act in the role of an interpretive center of truth without manipulating entities, and thus, obscuring their free will? The Grand Experiment was designed with free will as its primary method of obtaining authentic information that can be used to expand Source Reality to all dimensions of existence. Free will is the thread of authenticity that imbues

value in the various tests within the Grand Experiment. The hierarchy or any other external structure never jeopardizes free will. Only the entity can choose their reality, and this is the fundamental principle of free will.

Free will is not obscured simply because an entity is presented with alternative realities or relative truths that delay its realization of Source equality. It is the choice of the entity to invest itself in external accounts of reality instead of delving within its own resources and creating a reality that is sovereign. The value of free will is always expanding as you move towards sovereignty, and in like manner, is always diminishing as you move towards external dependence. The choice between sovereignty or external dependence is the basis of free will, and there is no structure or external source that can eliminate this basic choice. It is an inward choice that, regardless of outward circumstance, is incapable of being denied by anything external.

The Universe of Wholeness encompasses all dimensions (including Source Reality), and therefore, all realities are contained therein. In this incomprehensible diversity, each entity is provided a structure that defines their free will in terms of its relation Source Reality. Each of these structures varies in latitude of choice, but each is connected into the superstructure of the hierarchy. The structureless reality of Source Reality is where free will was initially conceived, and when the principle expanded into the time-space universe as the thread of authenticity, it became increasingly dependent upon the entity's recognition of its wholeness in relation to Source Intelligence.

If the entity was fragmented into its component parts, its comprehension of free will was limited to that which the hierarchy circumscribed. If the entity is a conscious collective, realizing its sovereign wholeness, the principle of free will was a form of structure that was unnecessary, like a fire in a summer's day. When entities are unknowing of their wholeness, structure will occur as a form of self-imposed security. Through this ongoing development of a structured and ordered universe, entities defined their borders--their limits--through the expression of their insecurity. They gradually became pieces of their wholeness, and like shards of glass from a beautiful vase they bear little resemblance to their aggregate beauty.

If you were to perceive the origin of your existence, you would undoubtedly see how vast the entity is. If you could pierce through the veils that cover your destiny, you would understand how much vaster you will become. Between these two points of existence--origin and destiny--the entity is always the vibrant container of Source Intelligence. It has willingly allowed itself to explore the time-space universes as an outpost of Prime Creator. Therefore, while the hierarchy may obscure the entity's comprehension of its wholeness, it is the entity who has surrendered, by choice, to listen to the language of limitation, the proclamations of externals, and become seduced by the model of evolution/saviorship.

Why has the hierarchy not provided the alternative model of transformation/  
mastership and enabled the entity to make a choice, and in so doing, truly exercise its free will? It is because the hierarchy, like most entities, is not aware of its wholeness. Its fragments, or subgroups, are completely devoted to boundaries. Where there are boundaries that define and limit, there is also structure. Where there is deeply ingrained structure there is a pervasive belief that transformation is impossible. Naturally, the time-space universe conforms to the matrix of belief projection, and the very concept of transformation is removed from the hierarchy's reality.

Thus, the hierarchy is unable to even conceptualize the model of transformation/mastership with any precision, let alone inform the entity that alternatives exist which issue from Source Intelligence. The hierarchy is not responsible for this condition, each entity is. The dominant model of Source Intelligence is primal. It existed before the hierarchy. It is the entity that has chosen to explore the hierarchy's model of existence for the purpose of participating in the Grand Experiment and assisting in the emergence of the synthesis model of existence. The hierarchy is quite benign as a manipulative force, and merely represents a key ingredient to the recipe of wholeness that is transforming the entity to reach beyond its role as a vibrant container of Source Intelligence, and become the bridgeway in the expansion of Source Reality into the time-space universes.

There is an ancient belief, born of the hierarchy, that the time-space universes will ascend into Source Reality and the human instrument of love will accompany this ascension process. However, it is Source Reality that is expanding to encompass the time-space universes with the purpose of aligning all entities to the synthesis model of existence. Source Intelligence is stripping away the veils that hide the true meaning of the entity model of expression in the time-space universes. When this occurs, the entity will possess Source equality in all dimensions and fields of vibration, and its componentry will be united for the full expression of its sovereign perspective.

This transformation of the entity is the pathway into wholeness and the recognition that the entity model of expression is a composite of forms and the formless that is unified in one energy, one consciousness. When the fragments are aligned and inter-connected, the entity becomes the instrument that facilitates Source Reality expansion. Thus, the entity does not ascend from the time-space universes, but rather coalesces into a state of wholeness whereby its sovereign expression can assist in the expansion, or in a different context, the descent, of Source Reality into the time-space universes.

Ascension is often construed as the natural outcome of evolution. That all planetary systems and species are evolving to the point where they ascend from limitation, and that eventually, the time-space universes will somehow fold into Source Reality and cease to exist as fields of vibration. It is

actually quite the opposite. Source Reality is descending. It is inclusive of all things, and it is the Source intention to expand, not retreat. The entity transforms to wholeness within the cradle of the time-space universe, and, in so doing, becomes the accessory of Source Reality's intention to expand.

Can you see the perfection of this Primal Blueprint? Can you feel the shifting of the matrix from which your reality is cast? Can you not also understand that you, the human instrument, consist of a componentry that is individuated as a single point of pure energy, yet live in many places on many dimensions simultaneously? Only within the entity is the place of transformation discovered, where the formless Self can enter and commune with its various outposts of form. The formless is the Eternal Watcher who lives behind the veil of form and comprehension, and draws forth the wisdom of time from the well of planets. It is the point of origination from whence Source Intelligence flows.

The Eternal Watcher is the only real interpretive center for the entity. It is the only stable guidance system that can propel the entity to its wholeness. Thus, the entity is composed of both the formless identity of Source Intelligence and the formful identity of densified energy. While the formless is one, the formful is divested in many fragments of expression that isolate its consciousness as islands of perception and expression. This condition results in the entity's denial of its vast and glorious nature of existence.

In the human instrument, the entity, for the most part, is silent and unmoving. It appears like a fleeting whisper of gladness that touches you like a mountain wind. It is quiet like a deep ocean. Yet, the entity is coming forward into the time-space universe as a harbinger of Source Reality expansion. It is beginning to make itself known as it truly is. Many feel the shadow of their entity as it approaches. They consign all forms of definition to this "shadow", seldom believing it to be the torchbearer of their total selfhood. Here is where all the vows of faithfulness, all the ceremonies of love, and all the feelings of hope should be centered and given over to the sovereign entity that we each are.

The primary reason that the hierarchy's model of evolution/saviorship is so compelling is because the entity has become fragmented in how it perceives its total selfhood. The Eternal Watcher that lives through the human instrument is illusive to the time-space conditioned mind, yet it is the mind that attempts to reach out and touch this subtle vibration of Source equality that is forever kindled by Source Intelligence. However, the mind is too conditioned and disempowered to realize the total scope of the entity that exists beyond the shadows of intuition. It is for this reason that the species is exploring the evolution/saviorship model of existence. They have little or no conception of their wholeness, and require a savior and the acclimation process of evolution, to bring them security and happiness.

It is a natural condition of an evolving species to have a desire, implanted by the hierarchy, to be saved and to be a savior. This condition results in the teacher/student ordering of the universe, and it is a building block of evolution and the very essence of the hierarchy's structural existence. While some species resort to the drama of survival to catalyze their evolutionary progress, other species resort to the drama of being saved and being a savior. The saviorship drama is an expression of sovereign entities that are preoccupied with the evolutionary process, and it is not confined to a religious context, but indeed applies to all facets of one's life.

As there are relative truths, there are relative freedoms. If you are evolving through the hierarchical process you gain an ever-increasing sense of freedom, yet you are still controlled by the vibration of externals through languages, thought forms, frequencies of color and sound, and the seemingly indelible artifacts of the genetic mind. Each of these elements can cause the human instrument to rely upon the hierarchy as it overlays a sense of inequality between you and your Source. The underlying equation of the evolutionary process is human instrument + Hierarchy = God connection. In the case of the transformational process, it is Entity + Source Intelligence = Prime Source equality.

Source Intelligence, though it generally manifests as the vibration of equality, is subject to the will of Prime Creator, and as the Source intention changes through the various stages of the Grand Experiment, Source Intelligence is also changing its form of manifestation. This change is occurring now within the worlds of time and space because Prime Creator is beginning to set the stage for the integration of the two primary models of existence (evolution/saviorship and transformation/mastership) within the Grand Experiment.

The time has come to integrate the dominant model of the hierarchy (evolution/saviorship) with the dominant model of Source Intelligence (transformation/mastership). This integration can only be achieved at the level of the entity. It cannot occur within the context of a human instrument or an aspect of the hierarchy. Only the entity--the wholeness of inter-dimensional sovereignty imbued with Source Intelligence--can facilitate and fully experience the integration of these two models of existence.

This form of integration occurs when the entity fully explores the two models and develops a synthesis model that positions saviorship as an internal role of the entity to "save" itself, and not rely upon externals to perform this liberating task. This act of self-sufficiency begins to integrate the saviorship idea with the mastership realization. The next step is to integrate the time-based incremental progress of the evolutionary model with the realization-based acceptance of the transformation model. This is done when the entity is thoroughly convinced that experience and utilization of its wholeness can only occur when it is completely detached from the various structures of the

hierarchy.

While the entity assumes its role of personal liberation, it does not mean that the hierarchy is to be shunned or avoided. The hierarchy is a wondrous instrument. It is symbolic of the body of Prime Creator, enabling IT to submerge within the time-space universes similar to how the human instrument allows the entity to function outside of Source Reality. The hierarchy is a vehicle of transformation even when it acts to suppress information and keep species in obedience to its controlling hand. It is part of the ancient formula that prepares a new universe for the synthesis model of existence and membership in the Universe of Wholeness.

The combination of self-saviorship and detachment from the hierarchy initiates the synthesis model into manifestation. The synthesis model is the next outcome of the Grand Experiment, and in certain vibrational fields of the multidimensional universe, there are entities who are indeed experiencing this stage of the experiment as forerunners of the entity model of Source individuation.

These entities are specifically designed to transmit this future experience into communication symbols and life principles that facilitate the bridging of the two models of existence. Beyond the initial design and construction of these "bridges", these entities will remain largely unknown. If they were to do anything more, they would rapidly become a fixture of the hierarchy and their missions would become compromised.

These Sovereign Entities are not present in the time-space universe to be formal teachers. They are present to be catalysts and designers. They are present to ensure that Source Intelligence is allowed to balance the dominant force of the hierarchy and its model of evolution/saviorship. They will not create a new belief system. Instead, they will focus on developing new communication symbols through various art forms that facilitate the entity's detachment from the controlling aspects of the hierarchy. The Sovereign Entities will also demonstrate the natural ease of interweaving the two primary strands of existence into a synthesis model.

In the advancing epoch of human development, entities will collectively design new pathways beyond the synthesis model of existence so that a new hierarchy can be constructed that is fashioned from Source Intelligence information. This new hierarchy will be cast from the knowledge gained from the Grand Experiments of the time-space universes, and the cosmic cycle will regenerate itself into a new field of vibration and existence. This new model of existence resists definition, and word-symbols are completely inadequate to describe even the shadowy outlines of this new form of existence that is emerging from out of the synthesis model in your future time.

The WingMakers are a small team of Sovereign Entities that have designed time capsules that are catalytic in forming a Sovereign Integral perspective. Each time capsule is, in

actuality, a selection system that attracts specific entities to utilize their human instrument in wholeness. This develops their sixth and seventh sense, which enables them to learn how to step out of time and the hierarchy's control. When they can do this, they can design the synthesis model of existence within terra-earth's hierarchical system.

These entities will be transforming time-space universes from ladders of consciousness to inclusions of Source Reality. In other words, Source Reality will be extended into time-space universes, and all life forms therein will experience this extension through a new hierarchical structure that is completely aligned with Source Intelligence. What some call "heaven on earth" is merely an echo-realization of this impending future time. What is truly bearing down on the time-space universes is the expansion of Source Reality through the accessibility of Source Intelligence information to all entities regardless of form or structure.

When this accessibility is complete and the Source Coding is fully activated, all entities will be part of a new cosmological structure. This new structure will invoke the next model of existence, which is already being developed within Source Reality by Source Intelligence and the Sovereign Entities. What is being activated now upon this time-space universe is the initial preparations for these shifts in the models of existence. More specifically, upon terra-earth, these models of existence will be simultaneously played out over the next epoch of time. As always, it will be the choice of the entity as to which model they embrace as reality.

These various models of existence will generally occur in a pre-determined sequence, but not necessarily in a pre-determined timeframe. The sequence of Source Reality expansion is: Source Intelligence creation of new fields of vibration; the ongoing development of an entity constructed hierarchy to act as the superstructure of the new creation; the emergence from the hierarchy of a dominant model of existence, in this case, the evolution/saviorship model; the introduction of the Source Intelligence model of existence, in this case, the transformation/mastership model; the intermixing of these two models to form a synthesis model of Source equality; and finally, Source Reality expansion to the inclusion of all dimensions and entities.

When this sequencing of the Primal Blueprint is achieved, the process, with all that has been learned by Source Intelligence, will be reconfigured and a new element of the Primal Blueprint will be revealed that is unknown at this stage even by Source Intelligence. The time required to fulfill the complete cycle is undetermined, but it is reasonable to expect that its completion is yet so distant in time that to attach measurement is simply a feeble attempt at estimating the unknowable.

Let there be no mistake, however, that the fulfillment of the Primal Blueprint is indeed the direction all entities are traveling. While entities of all levels are bestowed free will

within their own realities, they are not, as aspects of Source Reality, given free will to choose their ultimate destiny. The origin of entities is Source Intelligence, and it is Source Intelligence that determines destiny as well as origin. Still, entities are provided tremendous latitude of choices to propel themselves from origin to destiny and re-emerge into an expanded version of Source Reality with a renewed vision of their identity.

All of the highest imaginings of the human instrument are yet unaware of the deepest foundation of the Primal Blueprint. They have sought the upper reaches of the building, and remain unaware of the foundation's design. It is here, at the very bottom of existence that Prime Creator is bursting forth with ITS energy and is retreating with ITS equality of sovereign mastership. It is here that equality is realized, not in the lofty places of relative truth lodged in the hierarchy, but in the deepest part of the foundational plan of life's origins and destiny, where time rejoins itself into timelessness. The origin and destiny of existence is the tone of equality in life. Listen for this tone--this frequency of vibration--and follow it back into the very foundation from whence all things arise and return.

This frequency of the tone-vibration of equality is only heard with the seventh sense by the entity who is enveloped in a human instrument. The seventh sense can be developed by the time capsules<sup>1</sup> and will lead certain entities to their innermost or core expression. The core expression is what activates the seventh sense. Thus, before one can hear the tone-vibration of equality, they must gain access to their core expression. There is encoded in each of the time capsules, a system of languages that can lead the individual to their core expression. It is hidden because it is so powerful. And we will only lead the worthy to this power.

Consider these words as symbols only. Remember that language is a tool of limitation. Feeling is an antidote of limitation that permits the human instrument to leap over the boundaries of the logical mind and witness first hand the wordless power of collective energy individuated. Feel the truth that stands behind the symbols, and tap into this energy-force that reaches out for you. Know it as a tone-vibration--a resonance that waits for you around every corner in which your life will turn. It is the beacon of the Source Vibration gathering itself into the form of language in order to usher you to the place from which you can experience the formless tone of equality. The bypass of limitation. The Primal Language of Source Intelligence that bestows to you the freedom to generate your deepest beauty in the expression of the highest truth.

# Glossary

**The glossary is derived from the optical disc found in chamber 23 of the WingMakers' time capsule. It represents the definitions of key words and phrases that are used in the first two philosophical papers written by the WingMakers. As subsequent papers are made available on this web site, the glossary will expand accordingly. This is not a glossary of the terms used in the writings of Anne or Dr. Anderson. Those definitions can be found in the Interview Transcripts section of the web site.**

## **Human Instrument**

The human instrument consists of three principal components: The biological (physical body), the emotional, and the mental. These three distinct tools of perception, in aggregate, represent the vehicle of the individuated spirit as it interacts with the physical dimension of time, space, energy, and matter.

## **Entity**

The entity model of consciousness encompasses the individuated spirit sometimes referred to as the Higher Self or Soul. The entity is, in a sense, a fragment of the Universal Spirit Consciousness of Prime Creator. It is composed of a very refined and pure energy vibration that is equal to Source Intelligence (spirit). It is the entity consciousness that divests itself into human or otherwise physical vehicles in order to collect experiences that evolve and transform its understanding and appreciation of existence. It is the hub of the wheel through which all of its outposts of form and expression converge throughout the continuum of time and space. The entity is sovereign and simultaneously interconnected with all life through the Universal Spirit Consciousness (Source Intelligence). It is the animating force/energy within all life forms that is always in search of higher understanding and expression.

## **Sovereign Integral**

The Sovereign Integral is a state of consciousness whereby the entity and all of its various forms of expression and perception are integrated as a conscious wholeness. This is a state of consciousness that all entities are evolving towards, and at some point, each will reach a state of transformation that allows the entity and its instruments of experience (i.e., the human instrument) to become an integrated expression that is aligned and in harmony with Source Intelligence.

## **Prime Creator**

Prime Creator is the primal source from which all existence is ultimately linked. It is sometimes referred to as the Body of the Collective God. It represents the overarching consciousness of all things unified. This includes pain, joy, suffering, light, love, darkness, fear; all expressions and conditions are integrated and purposeful in the context of Prime Creator. IT encompasses all things and unifies them in an all-inclusive consciousness that evolves and grows in a similar manner to how each individuated spirit evolves and grows.

In most cultures where the term "god" or "goddess" is used to define this omnipotent power, it

often represents an entity that has evolved beyond the range of human comprehension and who manifests magical powers like manipulating the natural elements through thought or manifesting as non-corporeal Light Beings. These manifestations are described and depicted in virtually all cultures of the human race through its religious texts and mythology. While these may be entities that are highly evolved in their abilities and knowledge, they should not be confused with Prime Creator.

Prime Creator is not a manifestation, but rather a consciousness that inhabits all time, space, energy, matter, form, intent; as well as all non-time, non-space, non-matter, non-energy, non-form, and non-intent. It is the only consciousness that unifies all states of being into one Being. And this Being is Prime Creator. It is a growing, expanding, and inexplicable consciousness that organizes the collective experience of all states of being into a coherent plan of creation; expansion and colonization into the realms of creation; and the inclusion of creation into Source Reality-the home of Prime Creator.

This Being pervades the universe as the sum of experience in time and non-time. It has encoded ITSELF within all life as a vibration of frequency. This frequency is not perceptible to the three-dimensional, five sensory context of the human instrument, which can only detect a faint echo of this vibration. Prime Creator is present in all. And all are able to contact Prime Creator through this tone-vibration of equality. Prayers of supplication do not stir Prime Creator to response. Only the core expression of the individual's tone-vibration of equality will be successful in contacting Prime Creator in a meaningful way.

Prime Creator has many lower faces. These faces are often thought to be God Itself, but Gods are only a dimensional aspect of Prime Creator and there are many faces of God as well. The Hierarchy has made this manifest, not Prime Creator. Prime Creator is not beholden to any law nor does IT operate in conjunction with any other force or power. IT is truly sovereign and ubiquitous simultaneously, and thus, Unique. IT is not hidden or wary of life in any way. IT simply is Unique, and therefore, incomprehensible except through the vibration encoded within all life.

The other faces of God have been created so the human instrument can fathom Prime Creator and crystallize an image of this Unique Being sufficient to progress through the Hierarchy and access the Sovereign Integral perspective. Nevertheless, what you hold as God, is not Prime Creator, but a facet of Prime Creator developed by the Hierarchy as a comprehensible interpretation of Prime Creator. We must tell you that these "interpretations" have been exceedingly inadequate in their portrayal.

Because Prime Creator is Unique unto all creation, IT is indescribable, unfathomable, and incomprehensible other than through the tone-vibration of equality stored in the entity level of the human instrument and accessible through the core expression of the entity. Until there is a sufficient number of individuals who operate from the Sovereign Integral consciousness, the genetic mind will make access to this vibration difficult to achieve.

### **The Genetic Mind**

The genetic mind is the equivalent of a universal belief system that penetrates, to varying degrees, the human instrument of all entities. In some, it immobilizes their ability to think

original thoughts and feel original feelings. In most, it entrains their belief system to harmonize with the accepted belief systems of the Hierarchy. In a few, it exerts no significant force nor has any bearing on the development of their personal belief system.

There are those on terra-earth who are in training to be Sovereign Entities and are completely unaware of this training as well as their destiny. When they are able to become timeless and view the continuum of their lifestream, they will see the thread that has differentiated them as Sovereign Entities. They will understand how the hardships and supposed indifference of the universe were actually the catalysts for their emergence as designers of the new genetic mind.

The genetic mind is different from the subconscious or universal mind as it is sometimes referred to in your psychology texts, in that the genetic mind has a peculiar focus on the accumulated beliefs of all the people on a planet from its most distant past to its present time. These accumulated beliefs are actually manipulations of the Hierarchy, which imprint on the genetic mind in order to cast the boundaries of what is acceptable to believe.

So compelling is this manipulation and the boundaries that are imposed by the Hierarchy that virtually no one is aware of the manipulations of their beliefs. This is precisely why the WingMakers have interacted with your species from the very beginning. As culture bearers, we stretch your boundaries in the arena of science, art, and philosophy. We essentially expand the genetic mind's "perimeter fence" and enable it to encompass a larger portion of the "land" known as Source Reality.

If we were to tell you about the fundamental misconceptions of your genetic mind, you would not believe us. You would most definitely-even your most accomplished spiritual leaders-find us in contempt of much that you hold true and reasonable. You would feel fear in the face of our expression of Source Reality because it would be so clear to you how you have squandered your divine natures in favor of the entrapment of the genetic mind.

We know this will seem like a judgment of your beliefs, and it is to some degree, but you must know this about your belief systems: they are largely disconnected from Source Reality. They are like threads of a web that have become disconnected from the "branches" of Source Reality by the "winds" of the Hierarchy. Source Reality is represented in your belief in unconditional love, but of all the dimensions of your belief systems, this is the one thread that is connected-through the genetic mind-to Source Reality.

All of the other dimensions are connected to the genetic mind and have no ongoing connection to Source Reality. The genetic mind, as an intermediary and reflection of Source Reality, is completely and utterly inept. This is all part of the primal blueprint that designs the evolutionary pathway of a species through time. The genetic mind acts as a buffer for the developing species to experience separation from Source Reality. In this way, the human instrument is appropriately entangled in time, space, and the illusions of a disempowered belief system.

These factors, as disorienting as they are to the entity, are precisely what attract the entity to terra-earth. There are very few planetary systems in the multiverse that provide a better sense of separation from Source Reality than that which is experienced on terra-earth. By amplifying the sense of separation, the entity can experience more fully the individuated essence that is unique

and bears the resemblance of Prime Creator as a Unique Being. This is what draws entities to this world to incarnate within a human instrument.

So the genetic mind is an enabling force to experience separation on the one hand, and a disabling force to understand the true characteristics of Source Reality on the other. This dichotomy, when understood, helps to disentangle the human instrument and its entity consciousness from the limiting aspects of the genetic mind and its principle author, the Hierarchy.

Over the next twenty years, the genetic mind will become increasingly fragmented and thus, vulnerable to modification. This will be an effect of the growing ubiquity of intelligent networks and artificial intelligence therein. The expanding interconnection of intelligent networks has a significant impact on the genetic mind because of the emergence of a global culture that accompanies the arrival of such technologies.

### **OLIN Technology**

Intelligent networks are able to operate from a single language with translation interfaces that enable global intercourse. This means language is no longer a barrier to communication. Intelligent networks will introduce a meta-language that translates both real-time written and spoken applications. It will revolutionize the genetic mind's global construct, and facilitate the digitalization of your global economy.

There will be many within the Hierarchy, who will object vehemently to the notion of a global, digital economy, but we will tell you, it will happen regardless of the complaints and registered concerns. Your most powerful banks, computer manufacturers, and software companies will merge to create this momentous technology, and the One Language Intelligent Network (OLIN) will become the standard operating system of all the world's computer-based systems.

This will not occur until the year 2008, so it is some time before you will encounter this globalization of your economy, but all of the systems and architecture are already being designed and conceptualized in the minds of some of your brightest engineers and scientists. We assure you, this is not something to be feared, but rather embraced, and not because of the economic values, but because of the way the OLIN technology will facilitate the development of a global culture.

As the OLIN technology evolves, it will increasingly become subject to individual control. In other words, individuals will become inextricably linked into the network's entertainment and educational applications, which will become globalized. No longer will global media companies publish for a geographical market. They will produce content for a global audience and each individual will define what and how it desires to be entertained or educated.

The OLIN technology will "know" the preferences and interests of every individual linked to its network, and by the year 2016, it will be more ubiquitous than telephones in the late 20th century. Hence, the network will be controlled by individuals, and producers of content and services will be the "slave" or reactionary force of the individual. Thus, the individual will need to define their entertainment and educational desires carefully, or the OLIN technology will deliver content that is undesirable.

We know this sounds obvious and trite, but it is profoundly different than the way entertainment and education are delivered in your world of the pre-OLIN technology. The time capsules that the WingMakers have left behind will act as a template to those who operate outside of the limiting force of the genetic mind, and desire to create content for the OLIN technology even before it exists. The time capsules will show how to do this and demonstrate how to create multi-dimensional content that carries its viewer-participant into new corridors of understanding and illumination.

This is how the genetic mind will fragment and become unable to exert a unified force upon the human instruments of terra-earth. When it is in this condition it will yield to the transformation/mastership model of existence and form a synthesis with it. It will transform itself, and the genetic mind will become the leader of transformation for entities upon terra-earth instead of its barrier force.

### **Sovereign Integral Network**

The Sovereign Integral Network (SIN) already exists, indeed, has always existed. However, there has not been a way for it to connect or interface with your technologies. Terra-earth has created technologies that are largely mechanistic and electrical in nature, and it is just beginning to understand electromagnetic energy fields and holographic technology. Regrettably, when technologies are in their infantile stages of development, they are very often conformed to a military or economic control application. And this is the case with these emerging technologies.

SIN cannot interface with technologies bearing such an application. Not because it is impossible technologically, but because it is undesirable ethically. SIN is actually a sub-atomic network of light-encoded filaments that exist in all dimensions of the multiverse. Think of SIN as an infinite number of threads of light issuing from Source Reality, and, like a web, connecting every life form at its entity level to all other entities and Prime Creator. This is an organic network that is utilized by Prime Creator to transmit knowledge to entities and to receive knowledge from entities.

SIN will eventually be interfaced with OLIN technology, but this will not happen for several hundred years. The interface is too far beyond both your technology and understanding of cosmology, and no planetary system can be fitted to interface with SIN until it is absolutely pure in its content and application. Only Prime Creator makes this decision as to when a planetary system can become a node on SIN. This is the core purpose of WingMakers, to help terra-earth become a node on SIN before its opportunity to interface has past.

Each entity is a node of SIN, but so few realize this connection exists other than through what they read or hear. The connection is real and timeless, and occurs at the core, innermost aspect of the entity where beats the replica heart of Prime Creator. This is the repository of Prime Creator and exudes ITS Unique vibration like a radio tower sends its signals in all directions.

Even your physicists have found preliminary evidence of SIN in their research with their so-called super string theory. We assure you, however, that this network will eventually replace all other networks for the primary reason that it is the conduit into timelessness. And this is the destination that draws all humanoid species, initially, through a technological portal similar to

your Internet, which eventually leads to a biomorphic portal consisting of the encoded light filaments leading to the non-worlds of Source Reality.

When a human species transforms its genetic mind to utilize the Sovereign Integral Network, this then becomes the "ship" upon which it sails the seas of the cosmos. And in this way, the species is allowed to become "Gods" of newly created worlds in which it can re-enact the entire process of the Grand Experiment utilizing its knowledge base and wisdom that was achieved in the previous stage of its existence. On a grand scale, this process is cast in countless worlds across the multiverse, and orchestrating all of this wondrous activity of creation is Source Intelligence and SIN.

### **Source Intelligence**

Source Intelligence is the energy-consciousness of Prime Creator that is cast into all worlds, all dimensions, all realities, all life forms, all times and places. Source Intelligence is the Prime Creator projected into all that is. Source Intelligence, in effect, is the "eyes and ears" of Prime Creator, and its role is principally involved in expressing, upholding, and sustaining the will of Prime Creator. On a more personal level, it is a liberating force of energy-intelligence that serves to accelerate the expansion of consciousness and assist those who desire to unlimit themselves.

### **All That Is**

Source Intelligence is the projected intelligence of Prime Creator. Within this consciousness exists the synthesis and distillation of All That Is. It is an infinite library of knowledge and experience that can be tapped into through attunement and creative will. While Source Intelligence is the vehicle of cosmological unity, it also holds the information of All That Is and "circulates" this information and creative empowerment to all entities who are willing to reach for it and utilize it for the expansion of consciousness.

### **Universe of Wholeness**

The Universe of Wholeness is the aggregate of all dimensions and realities. It is unified and inter-connected through Source Intelligence. It is dynamic and always in a state of experimental change and evolution. It is simply too vast and dynamic to comprehend or to establish a measurement of any kind.

### **Fields of Vibration**

The Universe of Wholeness is a vast field of energy that is composed of innumerable dimensions of perception and existence. Within this macro-universe are dimensions of existence that are dominant realms of experience like the third-dimensional reality in which human life is rooted. Each dimension has its unique qualities of experience and these are known as fields of vibration because the vibratory rate of each dimension is the determining factor of its existence. The higher the vibratory rate of a dimension, the more expansive and unlimiting it is. Within the Universe of Wholeness there are, for all practical purposes, an infinite number of fields of vibration that an entity or Sovereign Integral can attune to and utilize as a experiential or dominant reality.

### **Source Reality**

Prime Creator exists in Source Reality. Source Reality is the dimension of consciousness that is always pushing the envelop of expansion--the leading edge of development and evolution for the

whole of consciousness. In this realm of dynamic expansion is always found Source Reality. It can be likened to the inner sanctum of Prime Creator or the incubator of cosmological expansion.

### **Sovereignty**

Sovereignty is a state of completeness and inter-connectedness. It is recognizing that as a human being you have an individuated spirit force that animates your physical, emotional, and mental aspects, and that through this spirit you are complete and connected to all other life forms through the Universal Spirit Consciousness (Source Intelligence). Sovereign beings understand that they alone create their reality and that they are responsible for their life-experience. They also understand that all other life forms are equally sovereign and that they also create their unique realities. Sovereignty allows that the source of liberating information is contained within the Self, and all that is needed to create new realities is also contained within the Self. It is the point of empowerment and connection to all through the frequency of love.

### **Source Codes**

Source Codes are imbedded "activators" that are present within the entity consciousness. They serve the specific purpose of awakening the human instrument to the multidimensionality of the entity and the liberating information that is stored within the entity consciousness. Source Codes are somewhat analogous to the genetic coding of DNA to the extent that Source Codes activate specific blueprints of transformation that accelerate and facilitate the expansion of consciousness. In effect, Source Codes catalyze the awakening of the human instrument and encourage it to make the quantum leap from a socialized human to a sovereign entity that is aware of its connection to All That Is.

### **Hierarchy**

The Hierarchy extends throughout the cosmos to the very borders of discovery. It has branches that extend from every star system, every dimension; and virtually all life forms are "leaves" of this cosmological tree. The Hierarchy constitutes the grand indoctrination of species, spirits, planets, and stars as they each evolve through the branches of the tree. It is an assemblage of externals that desire to invest their energies in support of a sub-group that has nested somewhere within the greatest of all structures: the Hierarchy. Service is the operational motive of the Hierarchy, and in most cases, this translates into the concept of saviorship.

The Hierarchy is composed of entities of all motives that have linked their energies into subgroups. Think of these subgroups as independent branches of a vast, cosmological tree--a structure that encompasses all things outside of Source Reality. The roots of the tree are bound in the soil of genetic memory and subconscious identity. At the base of the tree the first branches sprout and they are the oldest, representing the native religions of the specie. The middle branches are the orthodox religions and institutions, while the upper branches represent the contemporary belief systems that are newly emerging throughout the universe. The whole tree, in this definition, is the Hierarchy, and its purpose is to advance the evolution of life through a superstructure that results in the teacher/student ordering of the universe.

Prime Creator is connected to individuals not organizations. Thus, the Hierarchy is unconnected to the Source in a vital and dynamic way. The Hierarchy is more connected to its own collective desire to help, to serve, to perform a function that allows the use of power in a positive way. In itself, this is not wrong or misguided. It is all part of the Primal Blueprint that orchestrates the

unfoldment of consciousness from collective to individual and individual to collective. This is the spiral of integration that breeds wholeness and perfection within the Source Intelligence.

### **Wholeness Perspective**

The human instrument, because it is fragmented and limited to five-senses, truly desires the Wholeness Perspective; a way to absorb life experience, process it, and move on to the next thing with grace and ease. This is what is desired, no matter what name is used to describe it. Wholeness is accepting all realities and moving through them with a feeling of integration, unity, equality, and non-judgment. It means there are no dualities that are real. It means that all experience is equal and grounded in the transcendent reality of the One That Is All. And most importantly, it means that the One That Is All is you, me, him, her, it, that, and those. Nothing is excluded or rejected.

### **Wholeness Navigator**

Theories of evolution are layered upon your existing paradigm of a mechanical universe that consists of molecular machines operating in an objective reality that is knowable with the right instruments. The universe is truly unknowable with any instrument save your own sense of unity and wholeness. The perception of wholeness is forever unfolding in the human instrument because the culture of the multidimensional universe is rooted in unity.

Plants have root systems that penetrate earth and drink of her substance. In this way, all plants are linked. Imagine that each plant had a secret root that was invisible, but was nonetheless connected to the very center of the planet. At this point of convergence, every plant was indeed unified and aware that its real identity was this core system of interconnected roots, and that the secret root was the lifeline through which individual expression was brought to the surface of earth and its unified consciousness released as the fragrance of individuality. In this same way, all existence has a secret root that spirals into the uncharted realm of Prime Creator. This is the field of unity that defines the culture of the multidimensional universe.

All human life is embedded with a Wholeness Navigator. It is the core wisdom. It draws the human instrument to perceive fragmentary existence as a passageway into wholeness and unity. The Wholeness Navigator pursues wholeness above all else, yet it is often blown off course by the energies of structure, polarity, linear time, and separatist cultures that dominate terra-earth. The Wholeness Navigator is the heart of the entity consciousness, and it knows that the secret root exists even though it may be intangible to the human senses. It is this very condition of accepting the interconnectedness of life that places spiritual growth as a priority in one's life.

The five senses of the human body feed only a small part of an individual's wholeness. Yet the human instrument clings to these five senses as though they were the only pathways of experience. The seed vision of the Wholeness Navigator is equal to Prime Creator. It is a replica of Prime Creator vibrating precisely at the same frequency and capable of the same feats of consciousness. And the numberless secret roots that supply Prime Creator with insight, experience, intelligence, and perspective can be accessed, but not through the five senses which are designed for your ego consciousness.

The preceptors of the Wholeness Navigator consist primarily of the secret root. This is the subtle carrier of information that leads you to see the One That Is All and the All That Is One. This is a

facet of Prime Creator that is made manifest in the human instrument as a means of attracting the human instrument to the life of the Sovereign Integral consciousness. Let the secret root and the Wholeness Navigator guide you, and let the five senses be expressionary tools of the entity, rather than collectors of separatist thought for the human instrument.

How do you access the secret root? Its portal of observation can be broadly defined as the integral awareness. This is allowing yourself to be aware of how you are integrated to life outside of your physical body. It is the feeling and perception that you are a holographic entity that is woven throughout all things and time, and when you touch into this feeling, you recall a frequency of your consciousness that is the Wholeness Navigator--the mysterious Allness that is nurtured by the secret root.

This is not a state of being that the human instrument will attain. Rather, it is a feeling of oneness and wholeness that the human instrument can glimpse momentarily and, as a result, transform its understanding of its purpose. The Wholeness Navigator pulls the human instrument into alignment with the entity consciousness where it can view its role as an extension of the entity consciousness into terra-earth, and the entity consciousness as an extension of the human instrument into Source Reality.

### **Evolution and the Concept of Time**

When an individual evolves in consciousness it is quite different from the evolutionary process in terms of the physical body. For example, an individual can make a quantum leap in consciousness within a single moment in time, while in contrast, the physical body is gradually shaped over thousands of years. Thus, the entity transforms through a process of remembrance, while the human instrument--particularly the physical body--evolves through experience in vast stretches of linear time.

The individuated consciousness of the entity is the fragment of Prime Creator that is seeking to be remembered within the human instrument. It lives in an eternal state of nowness and represents the continuity of time and consciousness across all dimensions of reality. In other words, all dimensions of time are simultaneously experienced by the entity consciousness, however, upon terra-earth, the human instrument is usually only conscious of one dimension of time, typically calibrated in linear seconds.

This is why time plays such a significant role in the evolution of three- and four-dimensional structures like the human instrument, but has very little influence on the transformation of consciousness itself. The human instrument is grounded in a physical body that is constantly being shaped by experience, emotion, and thought, all of which is self-created. On the other hand, the entity consciousness is the multidimensional Self. It is the union of all the different aspects of consciousness that are invested within the time/space universes through instruments of contact; be they human or otherwise.

The entity may simultaneously inhabit a thousand human instruments spread across 200,000 years of linear time. To the human instrument of a specific time period, it will seem to be the one and only existence, but to the entity, all of its lives are occurring in nowness. The entity consciousness is the "hub" around which its various human instruments connect in to like spokes of a wheel. And the outer rim of the wheel is represented as circular time within the dimensions

of planetary life.

All of the "spokes", or time-based lives, are linked together at the entity consciousness where they converge into non-time. From the entity consciousness, through the portal of the Wholeness Navigator, this same experience is transmitted to Prime Creator, processed by Source Intelligence, and returned to the entity consciousness as a form of energy that enlarges the entity's perspective on matters of destiny, existence, and purpose. It is virtually impossible to express this interrelationship between Prime Creator, Source Intelligence, the entity, the human instrument, and time. Time makes it possible to segment this knowledge into fragments that can be shared between individual human instruments.

The human instrument is a composite of mental, emotional, and physical capabilities linked together to form a vehicle for the entity consciousness to experience planetary life. The human instrument evolves to better fit the needs of the entity. The entity transforms from a pure vibratory, individualized expression of Prime Creator, to a Sovereign Integral who has created its own experiential reality, and re-defined itself by the planetary experiences therein.

Eternity, while it may seem to exclude time, is nonetheless a form of absolute time that is not isolated into a sovereign reality, but instead, integrated in all realities like a thread of light that draws the disparate realities into union. In this dimension of union--where the entity consciousness is whole and all realities converge--time is articulated not by the linear progression of seconds, but rather, by the expansion of the vibration of equality or love. Thus, in eternity, time is simply re-defined by a new value system upon which entities establish and recognize their growth.

### **Models of Existence**

There are two dominant models of existence that shape the interaction and destiny of the human race. These models of existence are:

The Evolution/Saviorship model

The Transformation/Mastership model

Each human is developing their belief system from one or both of these models of existence. The evolution/saviorship model is the dominant model that is promulgated by the Hierarchy. Its basic tenets are that life evolves through the Hierarchy's teacher/student methodology, and that various teachers (saviors) are presented to the human race that enable sub-hierarchies to develop and control information. In so doing, individuals are disempowered and disconnected from their sovereignty. The underlying equation of the evolution/saviorship model of existence is:  
human instrument + Hierarchy = God connection through saviorship.

In the case of the transformation/mastership model of existence, its principle tenets are that the entity is limitless, deathless, and sovereign. All information flows from Source Intelligence to the entity, and, it is therefore the responsibility of the entity to become self-enlightened and self-

liberated by attuning itself to Source Intelligence and "detuning" itself from the Hierarchy. Each becomes their own master, and each transforms from a human being to a Sovereign Integral within the cradle of time and space. The underlying equation of the transformation/mastership model of existence is:

Entity + Source Intelligence = Prime Creator equality.

One of the challenges of the individual is to recognize these two dominant models of existence and integrate them in order to design a synthesis model. The synthesis model is slowly emerging on terra-earth, and with high probability, will ultimately become the dominant model of existence in this universe. It will be the model of existence that is best able to unify consciousness without impinging on the sovereignty of the entity and Prime Creator. It will allow the entity to be the vibrant container of Source Intelligence and explore new fields of vibration as a fully conscious outpost of Prime Creator.

I have created the Internet Archive user page 'Cosmic Race Sovereign Integral' to house all information organized from the original website in easily-downloadable (and printable) pdf format for humanity to receive, learn, integrate, and share the WingMakers Sovereign Integral. This is all from the originally disclosed Ancient Arrow site. All credit goes to the original 1998 [www.wingmakers.com](http://www.wingmakers.com), Sarah, Dr Neruda and the WingMakers; this page is just a collection of the information. I am looking forward to the time when the information from the additional 6 exhibitions inevitably will be more honestly presented to humanity.

On this user page you will find:

(

0) Introduction: The Story of the WingMakers

(My introduction, the original site Introduction, Project Briefing and Background, and the Labyrinth Group Ancient Arrow Project Overview memo)

1) The 5 Neruda WingMakers Interviews

(I have compiled the wantoknow.info original Interviews 1 and 2 that includes all tampered information, along with the additional 5 interviews (1 and 2 repeated) from the current site)

1) Ancient Arrow

(The disclosed 23 chamber Ancient Arrow site exhibit: 23 paintings, 23 poetic works, and 2 artifact photos. The 23 optical-disc-produced musical compositions from the original website is unable to be accessed and heard, so the music from the current website is unable to be corroborated as genuine. You may still complement this experience with the music (as intended by the WingMakers) on the current website but will need to use your own discernment as to whether you believe the music is from the optical disc or not)

(Music:

<https://soundcloud.com/wingmakers-com>

[https://www.youtube.com/watch?v=YFQIIXz\\_t-A](https://www.youtube.com/watch?v=YFQIIXz_t-A)

[https://www.youtube.com/watch?v=Iphx2PU\\_sq5](https://www.youtube.com/watch?v=Iphx2PU_sq5) )

1) The Sovereign Integral Philosophy

(The written philosophy of the WingMakers, along with its glossary)

2) WingMakers Additional Information

(Journalist Notes, Language Analysis Memo, WingMakers Artifacts Overview Memo)

)

I encourage you to first explore the original website and corroborate all information:

<https://web.archive.org/web/19990208011012/https://wingmakers.com/>

<https://www.wingmakers.us/>

On the original website Dr Neruda is referred to as Dr Anderson and Sarah is referred to as Anne, the names were changed in the further interviews. Anyone with additional insight to the WingMakers is welcome to email me here: [sovereignintegral4@proton.me](mailto:sovereignintegral4@proton.me)

It is my intention that the WingMakers Sovereign Integral continues to spread into the public domain awareness. I find this information to be a sacred and unprecedented disclosure that is assisting in unifying humanity as one global culture. It is some of the most important information on the Internet.
